SUMMARY

Master of Information and Communication Technology student at the University of Tasmania with a background in Chemical Engineering and Biotechnology. Experienced Quality Engineer with 2 years of industry experience in advanced manufacturing, specialising in quality systems, data analysis, process improvement, and problem-solving.

Currently developing skills in software development, databases, networking, and cybersecurity, seeking an IT internship opportunity to combine engineering experience with technology solutions.

EDUCATION

University of Tasmania | Australia

2026 – Present

Master of Information and Communication Technology

Relevant Coursework:

Software Engineering | Web Development | ICT Systems Administration | Programming | Networking

National Chung Hsing University | Taiwan

Sep 2019 – June 2023

Double Degree of Bachelor of Science in Chemical Engineering and Biotechnology

PROFESSIONAL EXPERIENCES

Formosa AdvEnergy Technology Co., Ltd

Taiwan

Quality Engineer

Mar 2024 – Feb 2026

- Developed and maintained ISO 9001 and IATF 16949 Quality Management Systems, including documentation and process standards.
- Conducted Root Cause Analysis (RCA) and corrective actions to improve manufacturing stability.
- Supported cleanroom project management and collaborated with production, R&D, and maintenance teams to optimise processes.

Bionime Corporation

Taiwan

Biochemical Technician (R&D)

Dec 2023– Mar 2024

- Conducted experiments to optimise blood glucose sensor performance through parameter analysis.
- Operated analytical instruments including HPLC and UV-Vis for testing and data collection.
- Analysed experimental data and prepared technical reports to support R&D decisions.

INTERSHIPS

Chain-Ray Co., Ltd

Taiwan

Quality Engineer Intern

Jan 2023– Mar 2023

- Performed product inspections, quality analysis, and documentation for manufacturing clients.
- Supported Quality Management System activities and production quality improvement.

Onyx Ta-Ho Environmental Services Co., Ltd (TCC × Veolia Joint Venture)

Taiwan

Environmental Engineering Intern

July 2022– Aug 2022

- Supported environmental operations, documentation management, and industrial process understanding.
- Gained exposure to waste management and sustainability practices.

SKILLS AND ABILITIES

Programming: Python, PHP, SQL, HTML, CSS, JavaScript

Web & Database: Laravel, SQLite, MySQL, Bootstrap

Systems: Linux, Networking Fundamentals, System Administration

Engineering: ISO 9001, IATF 16949, Root Cause Analysis, Data Analysis
